

Become a Certified Child Passenger Safety Technician

**MOTOR VEHICLE CRASHES ARE A LEADING CAUSE OF DEATH
AND INJURIES TO CHILDREN.**

CERTIFICATION TRAINING:

May 5-8, 2025

Attendance at
entire 3.5-day course required

Marshfield Medical Center

1700 West Stout St.
Rice Lake, WI 54868

As a Certified Child Passenger Safety Technician (CPST) you'll help save lives and prevent injuries by educating caregivers on the proper use of car seats, booster seats, seat belts and other vehicle safety systems.

The Child Passenger Safety Technician Certification Training will provide you with basic technical knowledge and opportunities to develop and practice effective communication skills for educating caregivers.

3.5-DAY TRAINING INCLUDES:

- Interactive lecture with discussion.
- Hands-on experience with all types of car seats and booster seats, both in the classroom and in vehicles.
- Skills evaluations to demonstrate knowledge you have learned.
- Participation in a car seat inspection event, where you will educate and assist caregivers and families.
- Participants receive a Teaching Guide to use during and after class.

Once you successfully complete your initial 3.5-day training, you'll be certified for two years. What services will you offer?

Who will you offer services to?

How will you continue to learn and build your skills?

The Wisconsin Child Passenger Safety Program will be here to help, offering direction, resources and learning opportunities as you work towards completing your

Recertification requirements
